

RIDER ALERT!

Overnight construction on the US 50/Placerville Dr. Interchange is set to begin at 9:00 PM tonight, January 21, 2010. This project is scheduled to continue through at least February 5, 2010. This could potentially cause serious delays or prohibit access for El Dorado Transit AM commuter routes scheduled to service the EDC Fairgrounds Park and Ride. These include AM routes #11, #2, #4, #3, #6, #10 and #7.

In an effort to avoid significant delays and minimize inconvenience to all of our valued commuter passengers, **El Dorado Transit will discontinue all commuter service to the EDC Fairgrounds Park and Ride effective Friday, January 22, 2010, until further notice.** Passengers that normally park at the EDC Fairgrounds Park and Ride are encouraged to utilize Placerville Station (Mosquito Road, Placerville) the Central Transit Facility (Commerce Way, Diamond Springs) or the Ponderosa Road Park and Ride (Wild Chaparral, Shingle Springs) as alternates through the duration of construction. El Dorado Transit buses will follow their regular schedule to all other Park and Ride facilities. Please check the current route brochures for times and locations, log on to www.eldoradotransit.com/schedules or call (530) 642-5383 for more information.

El Dorado Transit sincerely apologizes to our passengers for the inconvenience and extremely short notice. We realize this is an unfortunate and difficult situation for all involved. El Dorado Transit staff will continuously monitor this situation daily to determine the best possible solution and will return normal service as soon as possible.

Thank you
